GLOBAL QUALITY FILTERS

EUROPE 2017 FILTRATION CATALOG

PASSENGER VEHICLES

GLOBAL QUALITY

Millard® is the European Brand specialized in high tech filtration systems for the automotive industry. Quality is the essence that inspires us, resulting in filters made for the best vehicle brands in the world.

Millard® offers to its markets, products and services with the highest quality level. Innovation and new technologies allow the vehicle fluids to work in optimal conditions to benefit a conscious energy consumption, environmental care and health of the population.

Millard® es la marca europea especializada en la fabricación de sistemas de alta tecnología en filtración para la industria automotriz. La calidad es la esencia que nos inspira en la fabricación de productos de alto rendimiento para las más acreditadas marcas a nivel mundial.

Millard® ofrece a todos los mercados, productos y servicios con el mismo y más alto nivel de calidad. Innovar y desarrollar nuevas tecnologías que permitan el funcionamiento óptimo de los fluidos en beneficio de un consumo de energía consciente y respetuoso con el medio ambiente y la salud de las poblaciones.

Millard® é a marca europeia especializada no fabrico de sistemas de alta tecnologia em filtração para a indústria automóvel. A qualidade é a essência que nos inspira para a fabricação de produtos de alto rendimento para as marcas mais conceituadas a nível mundial.

Millard® oferece a todos os mercados, produtos e serviços com o mesmo e mais alto nível de qualidade. Inovar e desenvolver novas tecnologias que permitam um óptimo funcionamento dos fluidos em benefício de um consumo de energia consciente, que respeita o ambiente e a saúde das populações.

ISO 9001-2008

ISO 9001-2008

The prestigious German firm TÜV Rheinland, known for its extensive experience in the automotive industry has granted the Certification to Millard®, giving fulfillment to the requirements established by the international norm ISO 9001:2008.

Millard® has an advanced quality assurance system: “Global Quality” that allows us to achieve the industry standards in all the products that we offer, and it’s a warranty of original equipment equivalent.

Millard® está certificada por la prestigiosa acreditadora alemana TÜV Rheinland Ibérica Inspection, Certification & Testing, según la norma UNE-EN ISO 9001-2008.

Millard® posee un avanzado sistema de aseguramiento de calidad integrado “Global Quality” que a lo largo de su cadena de producción permite obtener los mismos estándares de calidad exigidos por la industria automotriz en todos los productos que ofrece y certifica como recambios de calidad equivalente al original.

Millard® está certificada pela prestigiada acreditadora alemã TÜV Rheinland Ibérica Inspection, Certification&Testing, segundo a norma UNE-EN ISO 9001-2008.

Millard® possui um avançado sistema de asseguramento de qualidade integrado “Global Quality” que ao longo da sua cadeia de produção permite obter os mesmos standards de qualidade exigidos pela indústria automóvel em todos os produtos que oferece e certifica como sobressalentes de qualidade equivalente ao de origem.

OUR LINE OF PRODUCTS

QUALITY IN DESIGN

Millard® product designs meet Automotive Manufacturer's specification requirements. Specifications are updated periodically through Design Reviews to insure perfection in materials and specifications.

QUALITY IN DEVELOPMENT

Development of a Millard® product strictly follows TS16949 norm standard which implies tools such as APQP (Advanced Product Quality Planning).

TECHNICAL DATA

QUALITY IN INDUSTRIALIZATION

Millard® strictly monitors its production in various ways, such as FMEA (Failure Mode & Effect Analysis) process tool.

QUALITY IN MANUFACTURING

Millard® sealed filters must pass leak-proof test to eliminate the chances of a defective product would reaching the market..

CABIN FILTERS

Air quality inside the passenger's cabin is guaranteed by Millard® cabin filters through the latest technology in pleating geometry, high tech synthetic fibers with and without activated carbon and its easy and accurate fitting, trapping health threatening agents such as allergens and bacteria.

La calidad del aire en el habitáculo es garantizada por los filtros Millard® a través de la más moderna tecnología de geometría de plisado en los elementos filtrantes y en su encaje fácil, cierto y preciso, evitando de esta forma los reflujos del aire no filtrados.

A qualidade do ar no habitáculo é garantida pela capacidade dos filtros Millard® através da mais moderna tecnologia de geometria de plissado dos elementos filtrantes e no seu encaixe fácil, certo e preciso, evitando desta forma os refluxos do ar não filtrados.

AIR FILTERS

Air is the most important fluid for the vehicle performance. The efficient working of the rest of the fluids (fuel and oil) depends on the quality of air absorbed by the engine. Millard's technology increases the filtration area, reduces humidity and it is high pressure resistant. Millard's air filters represent the perfect balance between nature and technology.

El aire es el fluido más importante ya que es el responsable por el desempeño de los demás fluidos, de él depende el buen funcionamiento de los motores a combustión. La tecnología de plisado Millard® permite un aumento considerable del área filtrante, la cual es resistente a la humedad y a altas presiones. Los filtros del aire Millard® representan el equilibrio perfecto entre naturaleza y tecnología.

O ar é o fluido mais importante já que é o responsável pelo desempenho dos demais fluidos, dele depende o bom funcionamento dos motores a combustão. A tecnologia de plissado Millard® permite um aumento considerável da área filtrante, a qual é resistente à humidade e a altas pressões. Os filtros do ar Millard® representam o equilíbrio perfeito entre a natureza e a tecnologia.

FUEL FILTERS

A perfect combustion needs an efficient filter, able to retain polluting agents. To this end, the cellulosic or synthetic media allows fuel to reach the optimal performance. In diesel vehicles, thanks to our pleating technology and Millard's experience in the most demanding injection and common rail systems, help to keep away the particles generated by oxidation and water condensation.

La combustión perfecta necesita un filtro capaz de retener los elementos contaminantes con eficiencia. Para tal efecto, los elementos filtrantes compuestos en material celulósico o sintético, constituidos por fibras de poliéster permiten que la gasolina alcance un alto desempeño. En los vehículos diésel la combustión perfecta es llevada a cabo gracias a la tecnología de plisado y a la experiencia de Millard® en los más exigentes sistemas de inyección convencionales y common rail. La retención de los contaminantes producidos por la oxidación y la condensación de agua permiten un óptimo nivel de funcionamiento de este fluido.

Uma combustão perfeita necessita um filtro com a capacidade de reter os elementos contaminantes com eficiência e para tal efeito o material celulósico ou sintético composto por fibras de poliéster é utilizado pelos filtros Millard® para permitir que o fluido gasolina possa conseguir um elevado nível de desempenho. Nos veículos a gasóleo uma combustão perfeita é possível graças à inovadora tecnologia de plissado utilizado pela Millard® e pela sua experiência nos mais exigentes sistemas de injeção convencionais e common rail. A retenção dos contaminantes produzidos pela oxidação, condensação de água com origem nas variações de temperatura, permite um óptimo nível de funcionamento deste fluido.

OIL FILTERS

Oil reduces engine wear, cools components and protects engine from erosion. Millard's technology takes care of the engine against the particles produced in the combustion, dust and abrasive fragments which increases engine friction. At the same time, our oil filters maintain the right viscosity removing the sludge and contaminants, satisfying original equipment manufacturer's required levels.

El aceite reduce el desgaste, refrigera los componentes y protege el motor contra la corrosión. La tecnología Millard® cuida el motor de los agentes contaminantes resultantes de la combustión, polvo y partículas abrasivas que pueden crear desgaste en el motor, al mismo tiempo que mantiene la viscosidad correcta cumpliendo con los niveles exigidos por el fabricante original.

O fluido óleo reduz o desgaste, refrigera os componentes e protege o motor contra a corrosão. A tecnologia Millard® permite proteger o motor dos agentes contaminantes resultantes da combustão, pó ou partículas abrasivas que podem criar desgaste nos diferentes componentes, ao mesmo tempo que mantem a viscosidade do óleo necessária para que as funções de lubrificação sejam cumpridas com os níveis exigidos pelo fabricante original.

A continuación, se describen el conjunto de Buenas Prácticas que reconocemos como acciones que valorizan las operaciones de cambio de filtros de cualquier clase en nuestro automóvil, recordando que estas deben realizarse siempre respetando los intervalos de tiempo o recorrido recomendados por cada fabricante y para cada vehículo, en los espacios apropiados y con la herramienta adecuada.

Atemperado del motor

El aceite caliente es más sencillo de retirar para realizar una restitución de filtro de aceite. Si el motor está frío, manténgalo funcionando al menos 10 minutos.

Contemporizado do motor

A substituição do filtro do motor deve ser feita com o do óleo quente, já que assim é mais fácil de o retirar. No caso do óleo estiver frio, ligue o motor até este atingir a temperatura ideal que permita a sua exclusão.

Vaciado del aceite del cárter

Para no contaminar el nuevo elemento filtrante con aceite sucio, se recomienda drenar y reponer la totalidad del circuito de aceite con aceite nuevo.

Esvaziamento do óleo do carter

Para não contaminar o filtro novo com óleo sujo, é recomendado a drenagem do óleo usado, fazendo assim a exclusão total do fluido presente no sistema de lubrificação.

Limpieza y aspirado de bases de montaje

Para la sustitución de filtros de aire o cabina, se debe realizar la limpieza de las carcasas o bases de montaje, para así evitar daños por los elementos que hayan quedado en el interior.

Limpeza e aspirado das bases de montagem

Previamente à substituição dos filtros do ar e habitáculo, as carcaças e bases de montagem devem ser limpas a fim de evitar danos ocasionados por elementos que tenham ficado no seu interior.

Sustitución de elementos de sellado en bases de montaje

Asegúrese de restituir la totalidad del filtro, en algunos casos, el elemento filtrante incluye un elemento de sellado, este también debe sustituirse con la reposición del filtro.

Substituição de vedantes nas bases de montagem

Confira a restituição do filtro na sua totalidade, alguns casos, o elemento filtrante pode incluir um vedante, este também deverá ser substituído.

Lubricación de juntas y retenes

Antes del montaje de elementos filtrantes de aceite o combustible, se recomienda untar con el mismo producto a filtrar, las juntas de estanquidad del dispositivo para mejorar su capacidad de sellado.

Lubrificação de vedantes e retentores

Previamente à montagem dos filtros de elemento para óleo ou combustível, recomenda-se lubrificar os vedantes como o mesmo produto a filtrar, para melhorar a sua capacidade de vedação.

Correcto posicionado del elemento filtrante

Especialmente en filtros "de cartucho" que van dentro de carcasas o tienen una posición concreta de montaje, es conveniente asegurar que esté en su lugar, de forma que su funcionalidad no se vea mermada.

Posicionamento do elemento filtrante

Em especial os filtros "de Elemento" que vão no interior das carcaças ou que apresentam uma posição específica, é conveniente conferir o seu correto posicionamento, de forma a que o seu funcionamento não esteja viciado.

Cebado de filtros

Especialmente en filtros tipo "Spin On" es recomendable realizar un pre llenado del fluido trabajado, para que, en casos como filtros de aceite, el motor no quede sin lubricación y se ocasionen daños en este.

Purgado de filtros

Especialmente nos filtros tipo "Spin On" o recomendável é realizar o preenchimento do filtro, para que a lubrificação seja constante, isto no caso dos filtros do óleo.

AS BOAS PRATICAS DA MILLARD FILTERS PARA MONTAGEM DOS FILTROS

A seguir, são descritos um conjunto de boas praticas que reconhecemos como as ações que garantem os processos certos na montagem de qualquer filtro na sua respetiva viatura.

Lembramos que os filtros a substituir devem cumprir e respeitar os intervalos de tempo e quilometragem recomendados pelo fabricante original da viatura objeto da referida montagem.

Asegurado de correcta entrada de rosca

Asegúrese de que los filtros tipo "Spin On" estén alineados con su base de montaje en el acoplamiento, no debería ofrecer resistencia, ya que esto significaría que no se ha realizado un acoplamiento correcto.

Asseverado de enroscamento

Certifique-se que os filtros tipo "Spin On" estejam alinhados com a base de montagem no acoplamento, não pode haver resistência, já que seria sinal que o referido acoplamento não está a ser efetuado de maneira satisfatória.

Apretado adecuado

El apretado de los filtros tipo "Spin On" debe de ser el adecuado, el grado de apretamiento viene grabado sobre el filtro. Un apretado deficiente o excesivo provoca fugas o degradación del sello.

Aperto adequado

O aperto dos filtros tipo "Spin On" deve ser adequado e satisfatório, o grau de aperto vem gravado no corpo do filtro. Um aperto deficiente ou excessivo pode provocar fugas ou degradação do vedante.

Correcto asegurado de conexiones

Especialmente en filtros con multitud de conexiones, es fundamental asegurar un correcto montaje, considerando el tipo de acoplamiento en cada caso y revisando la sujeción de estos después del montaje.

Aserto seguro das conexões

Especialmente em filtros com multitude de conexões, é fundamental acertar uma montagem correta, considerando o tipo de acoplamento em cada caso e revisando a sujeição destes depois da montagem.

Alimentación de circuitos

Especialmente en filtros de combustible gasolina, se recomienda previo al arranque del vehículo, cebar el sistema mediante el accionamiento del contacto sin arrancar durante 4-5 segundos.

Alimentação dos circuitos

Especialmente em filtros de combustível a gasolina, recomenda-se o prévio arranque da viatura, purgando o sistema através do acionamento do contato sem o arranque ter acontecido e durante 4-5 segundos.

Cerrado de carcasas o cartuchos

El montaje de toda clase de bases que contienen elementos de filtración, debe realizarse actuando sobre todos sus elementos de unión, ejecutando el grado de apriete recomendado por el fabricante.

Encerramento de filtros de elemento

A montagem de toda classe de bases que acolhem elementos de filtração, devem-se realizar atuando sobre todos os seus elementos de união, executando o grau de aperto recomendado pelo fabricante original da viatura.

Purgado de aire

Especialmente en filtros de combustible diésel, después del montaje y antes de arrancar el vehículo, es fundamental una exhaustiva purga de aire, no hacer esto puede ocasionar un incorrecto funcionamiento.

Procedimento de purga

Especialmente nos filtros do combustível diesel, depois da montagem e antes de ligar o motor da viatura, é vital uma exhaustiva purga do ar no sistema, ignorar este procedimento pode dar origem a falhas importantes no funcionamento do motor.

Inspección de fugas

Especialmente en filtros de aceite o combustible, una vez sustituidos y luego de haber arrancado el motor e incluso de realizar algún trayecto, se recomienda revisar las uniones buscando fugas que pueden ocasionar averías.

Inspeção de fugas

Especialmente nos filtros do óleo ou combustível, assim que sejam substituídos e logo do motor ter dado inicio ao seu funcionamento e inclusive depois de realizar algum trajeto na estrada, recomenda-se a revisão das uniões com a finalidade de encontrar fugas que possam ocasionar futuras avarias.

Catálogos Descargables

El catálogo de tu país a un click.

Búsqueda más potente

Hemos aumentado la potencia y la usabilidad de la misma.

Cuando realice una búsqueda, se mostrará un desplegable con posibles resultados.

Una primera sección con las referencias Millard que concuerden con su búsqueda, una segunda sección con las referencias de competidores, y su equivalencia en Millard.

Una tercera sección con los vehículos que concuerden con la búsqueda realizada.

Referencias Millard

Referencias de Competidor

Aplicaciones

Si lo desea, puede modificar este comportamiento a través del botón de opciones ubicado inmediatamente a la derecha de la caja de búsqueda y elegir qué resultados quiere consultar.

Si en la caja de búsqueda, en vez de Enter hace click en  el sistema le redirigirá a una página de resultados más extensa en función de lo escrito en la caja de búsqueda.

En esta página de resultados, podrá filtrar por tipo de resultado modificando los parámetros de la esquina superior derecha (Productos Millard, competidores o aplicaciones). Según el número de resultados obtenido, es posible que los resultados se organicen en varias páginas.

En la parte inferior de la página encontrará la barra para navegar a través de todas las páginas de resultados.

Si pulsa sobre uno de los resultados, accederá al detalle de los mismos, bien sea un producto Millard o una aplicación.

Sección de aplicaciones

Hemos dotado también de una mayor funcionalidad a la sección de búsqueda por aplicaciones. Ahora, en los desplegables de marcas, series o modelos, puede utilizar la caja de filtrado para encontrar rápidamente la aplicación buscada.

Filtros MC

Conheces os benefícios de substituir o filtro do habitáculo?

Catálogos Descargables

O catálogo do teu país com apenas um clique.

Pesquisa avançada.

Aumentamos a capacidade e a funcionalidade.

Quando efetuar uma pesquisa, irá aparecer um desdobrável com os resultados possíveis.

A primeira secção com as referencias Millard que se relacionam com a pesquisa, uma segunda secção com as referencia dos concorrentes e a sua equivalência na Millard.

Uma terceira secção com as viaturas que têm relação com a pesquisa concretizada.

Referência Millard.

Referência do concorrente.

Aplicações.

Se preferir pode alterar este comportamento através do botão de opções localizado logo à direita da pesquisa e assim selecionar os resultados pretendidos.

No motor de pesquisa em vez do ENTER fazer clique no  e será reencaminhado para uma página de resultados mais extensa de acordo com o que foi escrito na pesquisa.

Nesta página de resultados é possível filtrar por tipo, modificando os parâmetros do canto superior direito (Produtos Millard, concorrentes ou aplicações). Os resultados obtidos ficam organizados segundo o número ou volume encontrado.

Em todas as páginas e na parte inferior de cada encontrará a barra de navegação.

Ao fazer clique num dos resultados, terá acesso ao pormenor dos mesmos, seja de um produto Millard ou uma aplicação.

Secção de aplicações

Dotamos de uma maior funcionalidade a opção de pesquisa por aplicações, agora os desdobráveis das marcas, series ou modelos podem utilizar o filtro como mecanismo para encontrar rapidamente a aplicação pretendida.
