VEHÍCULOS LIVIANOS

# GLOBAL QUALITY

---

Millard® es la marca europea especializada en la fabricación de sistemas de alta tecnología en filtración para la industria automotriz. La calidad es la esencia que nos inspira en la fabricación de productos de alto rendimiento para las más acreditadas marcas a nivel mundial.

Millard® ofrece a todos los mercados, productos y servicios con el mismo y más alto nivel de calidad. Innovar y desarrollar nuevas tecnologías que permitan el funcionamiento óptimo de los fluidos en beneficio de un consumo de energía consciente y respetuoso con el medio ambiente y la salud de las poblaciones.

---

## ISO 9001-2008

---

### ISO 9001-2008

Millard® está certificada por la prestigiosa acreditadora alemana TÜV Rheinland Ibérica Inspection, Certification & Testing, según la norma UNE-EN ISO 9001-2008.

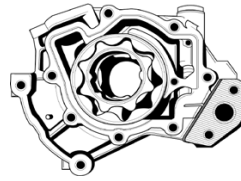

Millard® posee un avanzado sistema de aseguramiento de calidad integrado "Global Quality" que a lo largo de su cadena de producción permite alcanzar los mismos estándares de calidad definidos por la industria automotriz en todos los productos que ofrece y certifica como recambios de calidad equivalente al original.

# INFORMACIÓN TÉCNICA

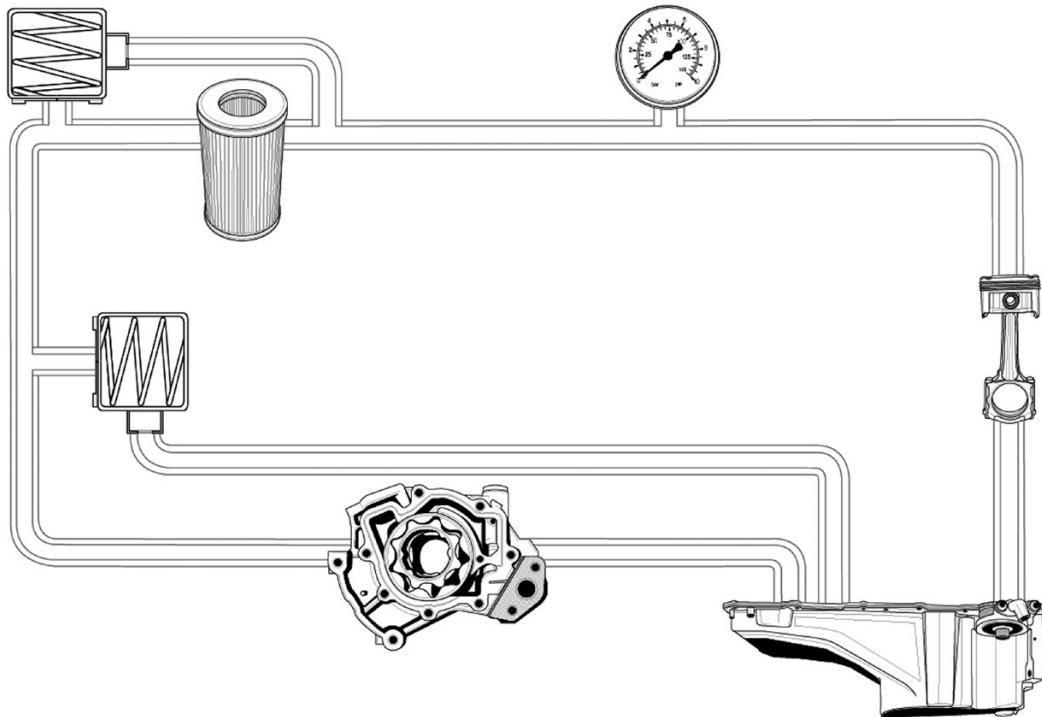

## CALIDAD EN LA INDUSTRIALIZACIÓN

Millard® supervisa los procesos productivos de sus fábricas con instrumentos de prevención de fallos AMFE (Análisis modal de fallos y efectos) aplicado al proceso de fabricación.

## CALIDAD EN LA FABRICACIÓN

Millard® supervisa los procesos. Todos los filtros estancos pasan por una fase de prueba de estanqueidad que afecta el 100% de las piezas, lo que elimina cualquier probabilidad de un producto con defecto pueda ser distribuido.

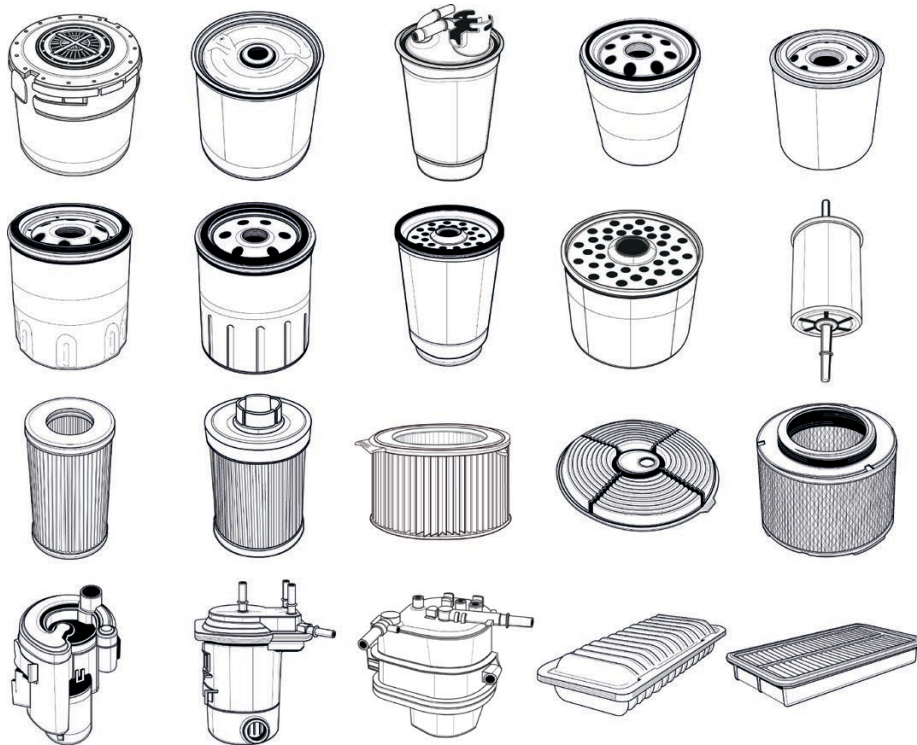

## NUESTRA LÍNEA DE PRODUCTOS

### CALIDAD EN EL DISEÑO

El diseño de productos Millard® cumple con las especificaciones requeridas por los fabricantes de Automóviles. Los diseños son auditados periódicamente a través de actividades de 'Design Review' para asegurar la puesta al día de materiales y especificaciones.

### CALIDAD EN EL DESARROLLO

El desarrollo de producto Millard® sigue las directrices marcadas por las norma TS16949 de la industria de la automoción e incluye la aplicación de las herramientas contenidas en el APQP (Planificación avanzada de la calidad de producto) de igual manera manera como que se utiliza en el desarrollo de equipos OEM.

## FILTROS DE CABINA

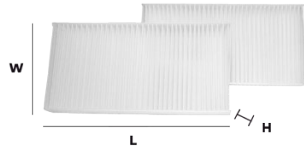

La calidad del aire en el habitáculo es garantizada por los filtros Millard® a través de la más moderna tecnología de geometría de plisado en los elementos filtrantes y en su encaje fácil, cierto y preciso, evitando de esta forma los reflujos del aire no filtrados.

## FILTROS DE AIRE

El aire es el fluido más importante ya que es el responsable por el desempeño de los demás fluidos, de él depende el buen funcionamiento de los motores a combustión. La tecnología de plisado Millard® permite un aumento considerable del área filtrante, la cual es resistente a la humedad y a altas presiones. Los filtros del aire Millard® representan el equilibrio perfecto entre naturaleza y tecnología.

## FILTROS DE COMBUSTIBLE

---

La combustión perfecta necesita un filtro capaz de retener los elementos contaminantes con eficiencia. Para tal efecto, los elementos filtrantes compuestos en material celulósico o sintético, constituidos por fibras de poliéster permiten que la gasolina alcance un alto desempeño. En los vehículos diésel la combustión perfecta es llevada a cabo gracias a la tecnología de plisado y a la experiencia de Millard® en los más exigentes sistemas de inyección convencionales y common rail. La retención de los contaminantes producidos por la oxidación y la condensación de agua permiten un óptimo nivel de funcionamiento de este fluido.

# FILTROS DE ACEITE

---

El aceite reduce el desgaste, refrigera los componentes y protege el motor contra la corrosión. La tecnología Millard® cuida el motor de los agentes contaminantes resultantes de la combustión, polvo y partículas abrasivas que pueden crear desgaste en el motor, al mismo tiempo que mantiene la viscosidad correcta cumpliendo con los niveles exigidos por el fabricante original.

## BUENAS PRACTICAS MILLARD FILTERS PARA EL CAMBIO DE FILTROS

A continuación, se describen el conjunto de Buenas Prácticas que reconocemos como acciones que valorizan las operaciones de cambio de filtros de cualquier clase en nuestro automóvil, recordando que estas deben realizarse siempre respetando los intervalos de tiempo o recorrido recomendados por cada fabricante y para cada vehículo, en los espacios apropiados y con la herramienta adecuada.

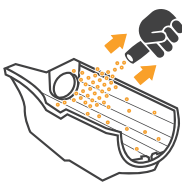

### Atemperado del motor

El aceite caliente es más sencillo de retirar para realizar una restitución de filtro de aceite. Si el motor está frío, manténgalo funcionando al menos 10 minutos.

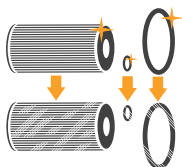

### Vaciado del aceite del cárter

Para no contaminar el nuevo elemento filtrante con aceite sucio, se recomienda drenar y reponer la totalidad del circuito de aceite con aceite nuevo.

### Limpieza y aspirado de bases de montaje

Para la sustitución de filtros de aire o cabina, se debe realizar la limpieza de las carcasas o bases de montaje, para así evitar daños por los elementos que hayan quedado en el interior.

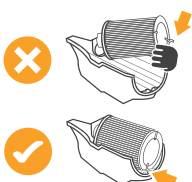

### Sustitución de elementos de sellado en bases de montaje

Asegúrese de restituir la totalidad del filtro, en algunos casos, el elemento filtrante incluye un elemento de sellado, este también debe sustituirse con la reposición del filtro.

### Lubricación de juntas y retenes

Antes del montaje de elementos filtrantes de aceite o combustible, se recomienda untar con el mismo producto a filtrar, las juntas de estanquidad del dispositivo para mejorar su capacidad de sellado.

### Correcto posicionado del elemento filtrante

Especialmente en filtros "de cartucho" que van dentro de carcasas o tienen una posición concreta de montaje, es conveniente asegurar que esté en su lugar, de forma que su funcionalidad no se vea mermada.

### Cebado de filtros

Especialmente en filtros tipo "Spin On" es recomendable realizar un pre llenado del fluido trabajado, para que, en casos como filtros de aceite, el motor no quede sin lubricación y se ocasionen daños en este.

	Aceite		Combustible					Aire		Cabina
	Ecológicos	Spin On	Ecológicos	Diesel DLF	In Line	Diesel Módulo	Spin On	Cilíndrico	Panel	Panel
Atemperado del motor	1	1								
Vaciado del aceite del cárter	2	2								
Limpieza y aspirado de la base de montaje							1	1	1	
Sustitución de elementos de sellado	3		1							
Lubricación de juntas y retenes	4	3	2				1			
Correcto posicionado del elemento filtrante	5		3					2	2	2
Cebado de filtros		4					2			
Asegurado de correcta entrada de rosca		5					3			
Apretado Adecuado		6					4			
Correcto asegurado de conexiones				1	1	1				
Alimentación de circuitos					2					
Cerrado de carcasas o cartuchos	6		4				3	3	3	
Purgado de Aire			5	2		2	5			
Inspección de fugas	7	7	6	3	3	3	6			

### Asegurado de correcta entrada de rosca

Asegúrese de que los filtros tipo "Spin On" estén alineados con su base de montaje en el acoplamiento, no debería ofrecer resistencia, ya que esto significaría que no se ha realizado un acoplamiento correcto.

### Apretado adecuado

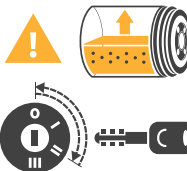

El apretado de los filtros tipo "Spin On" debe de ser el adecuado, el grado de apretamiento viene grabado sobre el filtro. Un apretado deficiente o excesivo provoca fugas o degradación del sello.

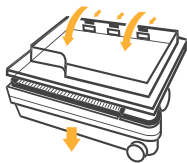

### Correcto asegurado de conexiones

Especialmente en filtros con multitud de conexiones, es fundamental asegurar un correcto montaje, considerando el tipo de acoplamiento en cada caso y revisando la sujeción de estos después del montaje.

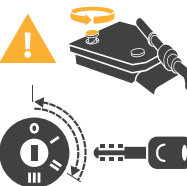

### Alimentación de circuitos

Especialmente en filtros de combustible gasolina, se recomienda previo al arranque del vehículo, cebar el sistema mediante el accionamiento del contacto sin arrancar durante 4-5 segundos.

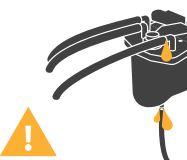

### Cerrado de carcasas o cartuchos

El montaje de toda clase de bases que contienen elementos de filtración, debe realizarse actuando sobre todos sus elementos de unión, ejecutando el grado de apriete recomendado por el fabricante.

### Purgado de aire

Especialmente en filtros de combustible diésel, después del montaje y antes de arrancar el vehículo, es fundamental una exhaustiva purga de aire, no hacer esto puede ocasionar un incorrecto funcionamiento.

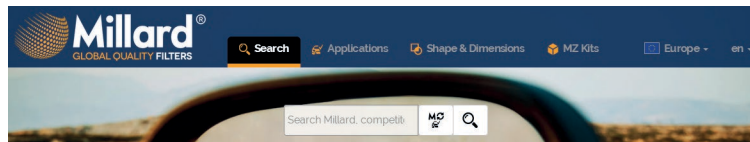

### Inspección de fugas

Especialmente en filtros de aceite o combustible, una vez sustituidos y luego de haber arrancado el motor e incluso de realizar algún trayecto, se recomienda revisar las uniones buscando fugas que pueden ocasionar averías.

## Landing page

Hemos mejorado la página principal del catálogo online. Seguimos dando prioridad a la búsqueda de productos, pero ofrecemos más información en la parte inferior de la página. Descubre los nuevos productos, o descarga directamente el catálogo en PDF.

### Kits MZ

Todo para tu coche en un solo pack.

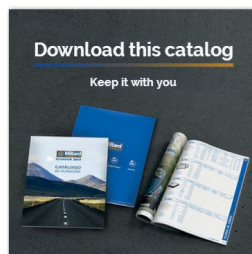

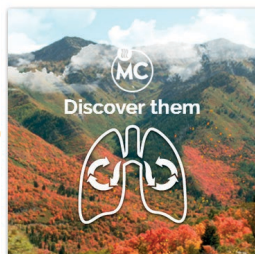

### Nuevos Productos

Descubre aquí nuestros nuevos productos.

### Filtros MC

¿Sabes los beneficios de cambiar tu filtro de cabina?

### Catálogos Descargables

El catálogo de tu país a un click.

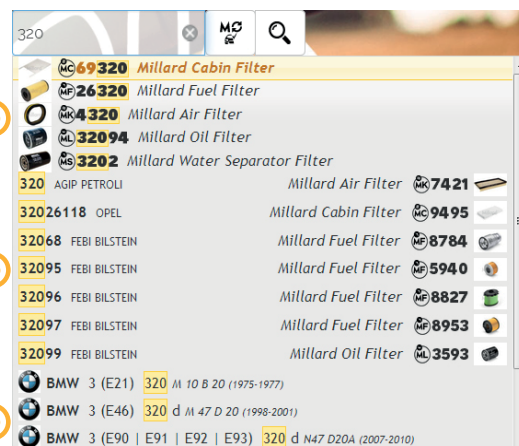

## Búsqueda más potente

Hemos aumentado la potencia y la usabilidad de la misma.

Cuando realice una búsqueda, se mostrará un desplegable con posibles resultados.

Una primera sección con las referencias Millard que concuerden con su búsqueda, una segunda sección con las referencias de competidores, y su equivalencia en Millard.

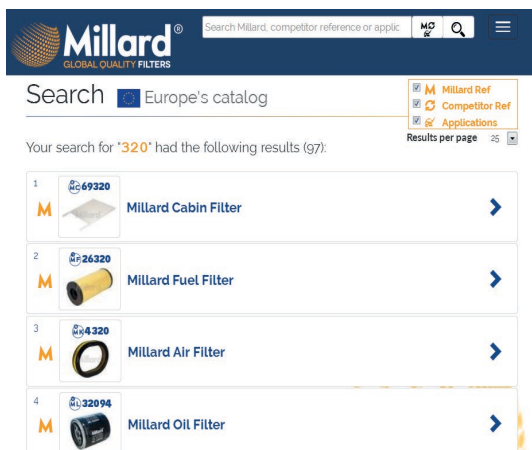

Una tercera sección con los vehículos que concuerden con la búsqueda realizada.

### Referencias Millard

### Referencias de Competidor

### Aplicaciones

Si lo desea, puede modificar este comportamiento a través del botón de opciones ubicado inmediatamente a la derecha de la caja de búsqueda y elegir qué resultados quiere consultar.

Si en la caja de búsqueda, en vez de Enter hace click en el sistema le redirigirá a una página de resultados más extensa en función de lo escrito en la caja de búsqueda.

En esta página de resultados, podrá filtrar por tipo de resultado modificando los parámetros de la esquina superior derecha (Productos Millard, competidores o aplicaciones). Según el número de resultados obtenido, es posible que los resultados se organicen en varias páginas.

En la parte inferior de la página encontrará la barra para navegar a través de todas las páginas de resultados.

Si pulsa sobre uno de los resultados, accederá al detalle de los mismos, bien sea un producto Millard o una aplicación.

## Sección de aplicaciones

Hemos dotado también de una mayor funcionalidad a la sección de búsqueda por aplicaciones. Ahora, en los desplegables de marcas, series o modelos, puede utilizar la caja de filtrado para encontrar rápidamente la aplicación buscada.

### Applications Europe's catalog

#### Manufacturer

Select a manufacturer.

## Sección MZ

Mejoramos la identificación de los MZ, mostrando las marcas para las que aplica el Kit.

Pulsando sobre el kit, accederá a la ficha extendida del MZ, obteniendo información sobre su composición y aplicaciones.

## Búsqueda desde la página web

Para mejorar la experiencia de usuario, hemos incorporado una caja de búsqueda directa en nuestra página web (www.millardfilters.com).

Esta se encuentra en el margen derecho, y desplegándola, podrás hacer una búsqueda directa en nuestro catálogo online.

El resultado de la búsqueda sería lo mostrado a continuación:

**CABINA**

**AIRE**

**COMBUSTIBLE**

**ACEITE**
